

Environmental Policy Statement

Whitland Engineering Ltd was established in 1985. The main trading activity of the company is project management together with in house mechanical and electrical design, fabrication, and installation. The Board of Directors of Whitland Engineering understand that the company's operations have an impact on the local and global environment. The company is totally committed to the continual improvement of its environmental performance and to the reduction of its impact on the environment through its activities.

In particular, the Company will:

- Comply with all relevant environmental legislation and statutory requirements.
- Ensure that the Environmental Policy is actively communicated to all employees and interested parties.
- Ensure that its activities do not impact protected or sensitive areas, waterways, or any wildlife.
- Reduce energy consumption by sustainable purchasing and continual review of operations using best and most efficient practice to minimise energy usage and carbon footprint.
- Adopt a system of integrated pollution control through risk assessment, reuse, recycling, and waste minimisation for all company activities.
- Ensure the correct management of all wastes, most particularly hazardous waste, therefore maximising the efficient usage of natural resources wherever possible and safeguarding the environment.
- Periodically review and update the Environmental Management System to ensure it remains effective.
- Provide adequate information, instruction, training, and supervision to all staff to prevent any possible pollution to the environment.

The company regards the protection of the environment and the prevention of pollution, as a mutual objective between management, employees and other interested parties that are engaged in the company's activities.

This statement is displayed at all sites of work in a prominent position and a full copy is available for reference on request.
